Effective dewatering and storage solutions

TITANTube® Hi-Flo Dewatering Tubes:

- Recover valuable mineral
- Recycle water
- Reduce the volume of waste to be disposed
- Reduce wear and tear on equipment

Reinforcement & Structures

Sludge Cap Reinforcement

- Furnish & install high strength geotextile
- Safe means to close sludge ponds
- Alternative to expensive solidification in place
- Our team has 30 years experience
- Flint supports the project from design phase to completion

Filled to Build Structures

- TITANTubes are filled with sand or other acceptable material to form structures
- Tubes are stacked to get the required height
- Used to form internal separation dikes within a pond
- Can form the perimeter of a landform to promote beneficial reuse of waste

Phasecon Mining

A DIVISION OF PHM GLOBAL

Unlock New Tailing Storage possibilities.

Titantube:

- Contain
- De-water
- Reduce cost
